SUMMARY

Enthusiastic and hands-on Computer Science student with a strong foundation in programming, data structures, and algorithmic problem-solving. Experienced in building AI-powered Telegram bots and scalable web applications. Passionate about Linux, artificial intelligence, and creating efficient software solutions for real-world challenges.

PROJECTS

SMOKE TO LIGHT

Nov 2023-Dec 2023

Developed an innovative project that converts smoke (air particles) into light using sensors and microcontrollers. The system detects smoke concentration in the air and dynamically controls light intensity or color as a visual indicator of air quality.

EDIBOT- (n8n + Gemini AI)

Jun 2025-July 2025

Created an AI-powered automation bot using n8n and Google Gemini API that processes patient medical data to intelligently schedule appointments. The system streamlines healthcare workflows by integrating data analysis, natural language understanding, and automated scheduling, reducing manual effort and improving efficiency in patient management.

EDUCATION

SCHOOL

Mount Carmel Matriculation Higher Secondary School, Hosur

COLLEGE

SNS College of Technology (Currently Pursuing) (2023 - 2027)

Bachelor of Engineering in Computer Science and Engineering

Current CGPA

8.90

CERTIFICATION

- Frontend-DMEX solutions
- Human Computer Interaction - NPTEL Web
- Development-Cognifyz Technologies GATE
- Qualified (yr - 2026)

TECHNICAL SKILLS

- C, C++, JAVA, PYTHON programming
- Databases : SQL, MongoDB
- Web Dev: HTML, CSS, JS, ReactJS, ExpressJS, Streamlit, Flask, Django
- Pandas, Matplotlib, Scikit learn(ML)

SOFT SKILLS

- Good communication skill
- Time Management
- Design Thinking

LANGUAGES

Tamil

English

Hindi(native)
